Work Experience

Freelance Software Engineer

Website Project for Cela Company – cela.az

Remote | Duration: 1 month

Technologies Used: HTML5, CSS3, JavaScript, jQuery, Font Awesome, Google Fonts, Swiper.js, Tailwind CSS, PHP, SQL

- Developed a fully responsive corporate website inspired by cela.az from scratch.
- Translated client requirements into a modern, user-friendly, and mobile-responsive interface.
- Utilized Tailwind CSS and Swiper.js to create a clean, dynamic, and engaging user experience.
- Implemented back-end functionality using PHP and SQL.
- Ensured cross-browser compatibility, responsive design, and performance optimization.
- Collaborated with the client throughout the development process and incorporated feedback to meet project requirements.
- Successfully delivered the project within the agreed timeline.
